

ARCHITREND OFFICE

This building, made of reinforced concrete and covered in glass, has a strong character and seeks to get around the traditional scheme. The building is composed of three volumes separated by the volume of the sky. The building has a large terrace on the first floor, creating a gap with the glass facade of the ground floor, which allows the volume of the building to be seen from the sky. The building is a modern office building with a large terrace on the first floor, creating a gap with the glass facade of the ground floor, which allows the volume of the building to be seen from the sky. The building is a modern office building with a large terrace on the first floor, creating a gap with the glass facade of the ground floor, which allows the volume of the building to be seen from the sky.

VILLA T

The relationship with the context and the construction of the main structural frame were on a set of continuous architectural elements that define the form of the structure. The main structural frame is composed of a series of concrete elements that define the form of the structure.
